**Subject:** Masternaut- Tamper proof

Hi Gary,

Following our telephone conversation please see below some technical information about the Masternaut tracking system.

Masternaut can track your vehicles through a box that we manufacture called the MCU 2 this is hardwired in to the vehicle behind the dash board, meaning it is inaccessible and tamper proof. We have a variety of aerials, windscreen mounted, and roof- mounted or hidden behind dash, if you choose to have a convert aerial (behind the dash you will ensure that it is tamper proof.)

The Masternaut MCU2 also has a motion sensor & emergency battery back-up, so even if it was disconnected you would still be able to track the vehicle.

Even though the hardware is tamper proof, we can still tell you if someone is trying to tamper with the equipment with a special alert.

Should you require any further information, please feel free to contact me.

Have a good weekend!

Warm Regards

Charlotte
